Sequence 37751, Application US/10369493

Sequence 37751, Application No. US2003023367BA1

GENERAL INFORMATION:

APPLICANT: Goo, Yongweir

APPLICANT: Glodman, Barry S.

APPLICANT: Glodman, Barry S.

APPLICANT: Chen, Xianfeng

TITLE OF INVENTION: EXPRESSION OF MICROBIAL EROTEINS IN PLANTS FOR PRODUCTION OF

TITLE OF INVENTION: EARNESSION OF MICROBIAL ENOTEINS IN PLANTS WITH IMPROVED PROPERTIES

TITLE OF INVENTION: EARNESSION OF MICROBIAL ENOTEINS IN PLANTS WITH IMPROVED PROPERTIES

TITLE OF INVENTION TOWNER: US/10/369,493

CURRENT APPLICATION NUMBER: US 60/360,039

PRIOR PRILING DATE: 2003-02-21

NUMBER OF SEQ ID NOS: 47374

TENERAL PARTICES OF MICROBIAL ENOTEINS IN UNBER OF SEQ ID NOS: 47374
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   1375 GECCTGGTCGCCTGGACCTGGCGACCGAAGGTGCGCTGGAACTACCAGTTCACCCAC 1434

GENERAL INFORMATION:
APPLICANT: Griffais, R.
TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, prever
TITLE OF INVENTION: and treatment of infection
FILE REFERENCE: 9710-003-999
                                                                  Sequence 11438, Application US/09252991A
Patent No. 6551795
GENERAL INFORMATION:
APPLICANT: Marc J. Rubenfield et al.
TITLE OF INVENTION: NUCLEEC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               956 TCGGCGAAATCGCCAACGAGTCACTCGGCGCAACAGCATCACGCCTTCGTTCAGAACTCG 1015
